

Our decisions and actions are based on the Social Model of Disability and the needs of our members and Customers

We each take responsibility for working in an honest, fair, respectful and professional way

We have the courage to lead change and shape a new and exciting future

We accept challenges with a 'can do' attitude and support each other to get the best outcome

The things that we do and the words that we say always reflect on the organisation in a positive way

We accept things do not always work first time and learn from our experiences focusing on the solutions not the problems

WECIL Charter
